Summary

I am an aspiring Full Stack Developer currently pursuing an MSc in IT, with a BSc in IT background. I build full-featured web applications using modern tech stacks and have a strong passion for learning, creating, and growing as a software developer.

Projects

Portfolio – My Portfolio Website
A visually stunning, interactive portfolio inspired by Awwwards-winning websites. It showcases my work, skills, and personality through clean UI, smooth animations, and a modern developer-focused design. Includes a guestbook feature with Google OAuth via NextAuth for visitors to leave public messages.

- Tech Stack: Next.js, Tailwind CSS, NextAuth, MongoDB, Framer Motion,
- Live Link: https://rajshekhardev.vercel.app

ChatWave – Real Time Messaging Website
Built a secure real-time messaging app with friend requests, Redis, and React Query. Includes session management, message delivery status, and clean UI design.

- Tech Stack: Next.js, Upstash Redis, React Query, NextAuth, Tailwind CSS, Pusher
- Live Link: https://chat-wave-vert.vercel.app
- GitHub Link: https://github.com/RajshekharBhagat/Chat-Wave

Ask-it – Anonymous Messaging Platform
Ask-it is an anonymous messaging platform where users can receive anonymous messages through a unique link. It ensures secure registration using OTP verification and allows users to control message reception via a toggle. Built with modern UI and deployed on Vercel.

- Tech Stack: Next.js, MongoDB, NextAuth, Tailwind CSS
- Live Link: https://ask-it-five.vercel.app
- GitHub Link: https://github.com/RajshekharBhagat/Ask-It
